Dry conditions continued into early November. Low humidities and periodic breezy weather created conditions favorable for wildfires. Rain later in the month caused the threat of wildfires to diminish considerably.

A severe thunderstorm in the Glen Rose area blew down a power transmission line, about six power poles, and some power lines. Power was knocked out to more than 2500 electric customers, some of whom had not finished cooking Thanksgiving dinner when the power failed. U.S. Highway 67 was blocked by fallen power lines near Gifford Rd. for a number of hours. Trees were also blown down, and one of the trees fell through the roof of a mobile home.

Thunderstorm winds blew down a sales tent at a large hunting supply store just north of Stuttgart. Winds at the Stuttgart airport, about 5 miles to the north, were measured at 49 mph. There was one minor injury.				
A strong cold front moved across Arkansas on Thanksgiving Day, dropping temperatures as much as 20 degrees in less than an hour. At one time during the afternoon, temperatures ranged from the upper 20s in the northwest corner of the state to the mid 70s in the southeast corner. Thunderstorms developed from midday through the afternoon in the warm, humid air ahead of the front. As colder air swept into the state, brief periods of sleet occurred across the northern half of the state during the evening, and there was even a little snow in places. Few problems occurred due to the wintry precipitation, however.
